## 9. RESULTS

### 9.1 LOCATION AND DATES OF THE STUDY

The study was performed at PCR Corp, located in Manchester between w/c 28<sup>th</sup> November 2022 and w/e 9<sup>th</sup> January 2023.

### 9.2 SUBJECTS

113 male and female subjects were enrolled into the study. 109 subjects completed the study. The age and gender of these subjects is presented in table in Appendix 2.

### 9.3 ADVERSE EVENTS, ADVERSE REACTIONS, SUBJECTS NOT COMPLETING THE STUDY AND DEVIATIONS

No adverse events or reactions were reported.

4 subjects withdrew for personal reasons.

There were no deviations that occurred during the conduct of the study.

### 9.4 ASSESSMENTS

Individual reactions to the test article are presented in Appendix 1.

As demonstrated by the individual skin responses to the test article:

#### **Test Article 1 – Orange House Laundry Detergent – Concentration (20221114)**

Elicited some mild erythematous reactions during the Induction phase of the study. These occurred in 4 of the 109 subjects that participated (Subjects – 14, 37, 63 and 74).

There were no questionable reactions observed during the Challenge Phase (Days 38 and 40) by any of the subjects to the test article. These results support the assessment that under the conditions of the study, the test article have demonstrated a low potential for irritation and sensitization.

## 10. CONCLUSIONS

The test article can be considered as safe for use under the conditions of the study, and claims such as, "Dermatologically Tested", "Clinically Tested", "Clinically proven", "Kind to Skin", "Mild for skin", "Safe for Skin", "Hypoallergenic" and "Dermatologist Approved" are substantiated.
